QUICK START GUIDE

Colourful LED Electronic Wristwatch for Children

Learn how to display and set the time and date using the single button on the side of the watch.

1 **One side button controls the watch**

Use brief presses to change values and longer presses to move between settings.

Displaying the time

1 **Press the side button once**

The LED display illuminates briefly and then switches off automatically.

Setting sequence

The settings appear in this order:

Hour > Minutes > Month > Date > Year

Button guide

BRIEF PRESS

Change the flashing value

Press for about 1 second, then release fully.

PRESS AND HOLD

Move to the next setting

Hold for about 3 seconds, then release fully.

Next: Follow the six step-by-step instructions on page 2.

Set the time and date

Release the button fully between every press.

1 Set the hour

Press once to illuminate the display. Hold for about 3 seconds. When the hour flashes, use brief presses to select the correct hour.

2 Set the minutes

Hold for about 3 seconds to move to minutes. When the minutes flash, use brief presses to select the correct value.

3 Set the month

Hold for about 3 seconds to move to the month. Use brief presses to select the correct month.

4 Set the date

Hold for about 3 seconds to move to the date. Use brief presses to select the correct date.

5 Set the year

Hold for about 3 seconds to move to the year. Use brief presses to select the correct year.

6 Save the settings

After setting the year, stop pressing the button. Wait about 5 seconds while the watch saves and leaves setting mode automatically.

Helpful tips

- If you pass a number, continue pressing until it cycles back.
- When setting minutes, use brief presses. A long press moves to the next setting.
- If the display switches off, press once to illuminate it and begin again.
- Do not press the button while the watch is saving.
- The display switching off automatically is normal.
- If your watch responds differently, contact customer service with a short video.
